1. Towards the Metaverse Universe

"We're Entering the Metaverse Universe, the new world of the future! The Whole Future Will Be Shaped Here."(CEO of MMX)

In the near future, the metaverse will become the mainstream of sandbox after the Internet. The meta-universe of the future will be very realistic and artificial intelligence-enabled human avatars will coexist in the Metaverse world, as in the Snow Crash novel.

Meta Max (MMX) is building the core blockchain platform and plans to introduce to the world a platform that supports augmented, virtual augmented and mixed reality applications based on the underlying technology that is absolutely necessary in the new metaverse world.

"The meta universe is coming." - Jensen Huang (CEO of Nvidia)

"I'm totally in the middle of the meta universe right now. I think the meta universe is getting closer to all of us. We're going to see more and more real-time three-dimensional (3D) worlds." – John Riccitiello (CEO of Unity)

2. Beginning

2.1. About Meta Max

Our aim is to build a Metaverse Blockchain and be used as a currency for all trades all over the world. We are working towards this end and trying to create our own Metaverse blockchain network.

Our other goal is to make the world greener with the support of GreenPeace, other nature conservation platforms and activists.

More than 1 million saplings will be planted in the world with a portion of the revenue from all sales. This will be a work we will do to reduce the damage done by crypto mining to nature.

Another project of ours is to use MMX Tokens as a valid currency in shopping platforms we have developed. Thus, in the future, people will be able to shop with MMX Token and we aim to increase the MMX Token supply and make it more valuable.

2.2. What is Crypto MMX?

Crypto MMX aims to disrupt the crypto trading industry by lowering the barrier to creating algorithmic metaverse trading patterns.

We have created a platform for crypto trading Metaverse Industry.

Cryptocurrency exchanges or digital currency exchanges (DCE) are businesses that allow customers to trade cryptocurrencies or digital currencies for other assets.

The creators of digital currencies are often independent of the DCEs that trade the currency. In one type of system, digital currency providers (DCPs) are businesses that hold and manage accounts.

Metaverse is the new revenue stream of the near future. It has become the focus of attention of all large companies. Our aim is to create our own crypto money in this world and to have a say in the world of the future. Because there is a volume of approximately 1 Trillion Dollars within the scope of the Metaverse project. In the near future, this volume will increase even more. We are already here! See you in the new Metaverse world!

3. Problems and Solutions

3.1. Problems

More than \$40 million in assets restricted for confiscation'and more than 30 Liberty Reserve modifier domains were confiscated.

Different parts of the new Internet are born as building blocks, but there is no way for them to work together.

Even the collaboration of new technologies with old central resources can be helpful in bringing about the Web 2 to Web 3 paradigm shift. Now that we own our data, we can prove that we own what we have and create it on different platforms, but how can we bring it together in a brand new, cohesive framework?

3.2. Answers

Decentralized cryptocurrency is produced collectively by the entire cryptocurrency system at a publicly known rate defined when the system was created.

In centralized banking and economic systems such as the Federal Reserve System, corporate boards or governments control the money supply by issuing fiat currencies or requesting additions to digital banking ledgers.

4. Our Projects

4.1. A Greener World

As it is known, our world is facing a climate crisis in the near future. The main reason for this climate crisis is the increase in carbon gases released to nature. Research by the US National Oceanic and Atmospheric Administration (NOAA); showed that there was a historical increase in the rate of greenhouse gases in the atmosphere in 2022 and that carbon dioxide emissions still constitute the biggest problem.

NOAA's Global Observation Laboratory examined 14,000 air samples collected from observation stations in many parts of the world in 2022 in its laboratories in Colorado, USA. As a result of the study, the 3 greenhouse gases originating from human activities and having the highest impact on climate change; The increase in carbon dioxide, methane and nitric oxide in the atmosphere was revealed.

According to the data obtained, the global surface average of carbon dioxide increased by 2.13 parts per million (ppm) to 417.06 ppm in 2022, similar to the increase over the last 10 years. This figure is 50% higher than before the industrial revolution.

NOAAR searches carried out by international independent organizations such as these show us that if we do not reduce carbon emissions in the near future, the world will get warmer, the melting in the poles will also increase, and as a result, it will be an inevitable end that global disasters will increase.

The original purpose of Meta Max (MMX) Token is to implement the "A Greener World" project in order to prevent this climate crisis. As it is known, Block Networks release a large amount of carbon to the nature. Our primary goal will be to establish our own blockchain network using energy systems that are completely renewable and emit zero carbon to nature. In this way, we aim to set an example for other blockchain networks and encourage them to use renewable energy systems.

While Meta Max is taking concrete steps in this regard, it will be our priority to plant 1 million saplings within the scope of "A Greener World" project in the first place by donating some of the revenues to international platforms that support nature such as Green Peace.

After this stage, Meta Max, after completing the institutionalization process, will establish the MMX Foundation and support projects such as renewable energy, solar energy and solar energy through this foundation and will personally work for the proliferation of these projects.

4.2. MMX Shopping Platform

We aim to establish a shopping platform to further increase the use of Meta Max. This shopping platform will be at an international level that can be used all over the country. A wallet where users can transfer MMX Token will be active within the platform after their approved membership. Thus, the user will be able to easily transfer the MMX Token in his hand to this platform and carry out purchases/sells on this platform with MMX currency.

After installing this platform, we will create a stable token linked to MMX Token to ensure a fixed price rate of transactions. In this way, all transactions will be fixed in USD and all transactions will be made securely with a fixed exchange rate.

With this project, we aim to increase the interest in MMX Token, to increase the supply, thus to make it more valuable and to become a currency used by everyone.

4.3. The Blockchain and the Metaverse World

We aim to establish our own blockchain network in order to manage all our projects more efficiently and to provide a better service to our investors. Thus, all our transactions will be more efficient, faster, cheaper, safer and more controllable in our own blockchain. We think that this will increase our efficiency and increase the interest in MMX Token and become the focus of attention of larger investors.

Our blockchain network will primarily work in full integration with the Metaverse world. With the MMX Token, which is fully integrated into the Metaverse world, which aims to combine virtual reality with the real world in the future, we aim to be a currency that bridges the real world and virtual reality, so that all monetary transactions are made with MMX Token.

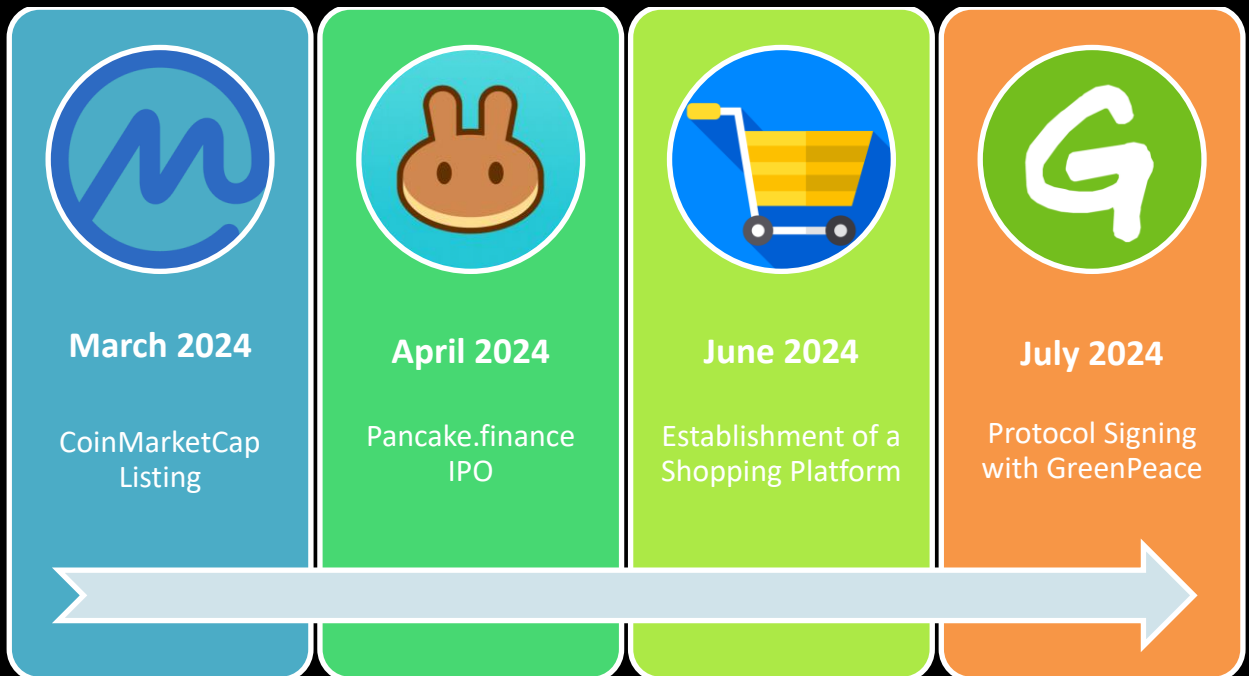

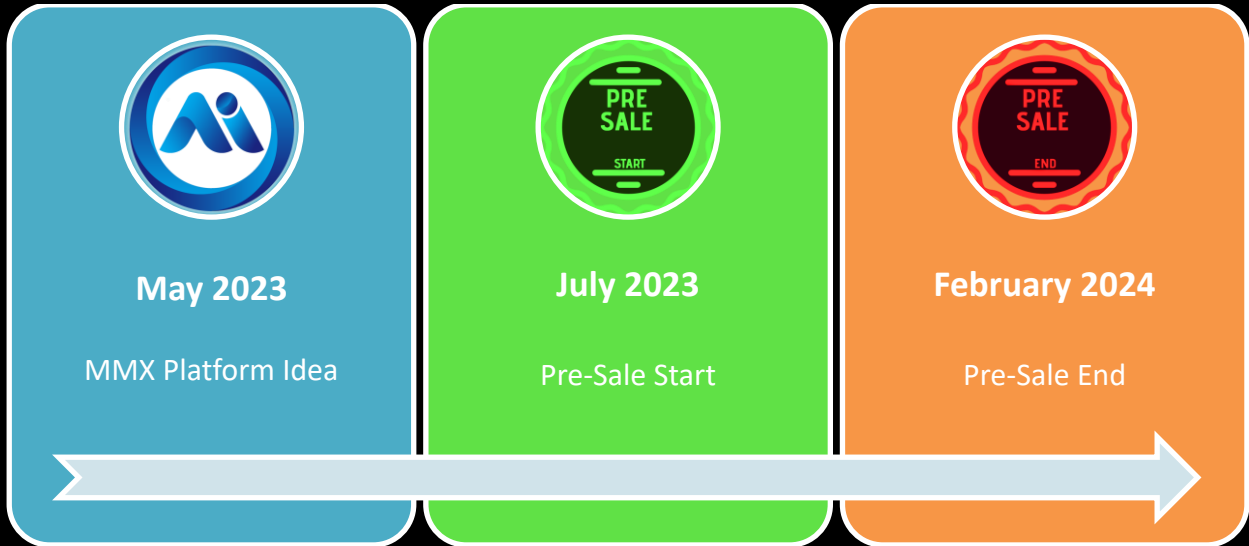

In this way, MMX owners will be able to use monetary transactions from both the shopping platforms we have established in the real world and the Metaverse world at the same time.

4.4. MMX Foundation

After completing the institutionalization process, we aim to establish the MMX Foundation. This foundation will support the "A Greener World" project with some of the revenues it receives from MMX and the donations it collects, and will work for the development of this project.

5. Our Roadmap

We set our roadmap. We will grow and develop with firm steps in line with our roadmap. We listed what we can do in the short and medium term with MMX Token.

6. Token Distribution

6.1. General Description

The pre-sale is usually done before the project is completed and for some of the larger Metaverse projects it helps fund the costs borne by the founding team up to launch.

Token Name:MetaMax

Token Symbol:MMX

Token Decimal:18

Total Supply:300,000,000 MMX

Token Contract:0x1A022F960D1fa69740a593CE70A7ad0C49C5B7F2

Token Network:Binance Smart Chain

6.2. Wallet Addresses

Pre-Sale Wallet: 0xb189e52eC7Cc8B58C26a68eC83532845a93009DA

Foundation Wallet Address: 0x9DAC3C1049f6333601F2bfEa7D5fF1cb58127BfD

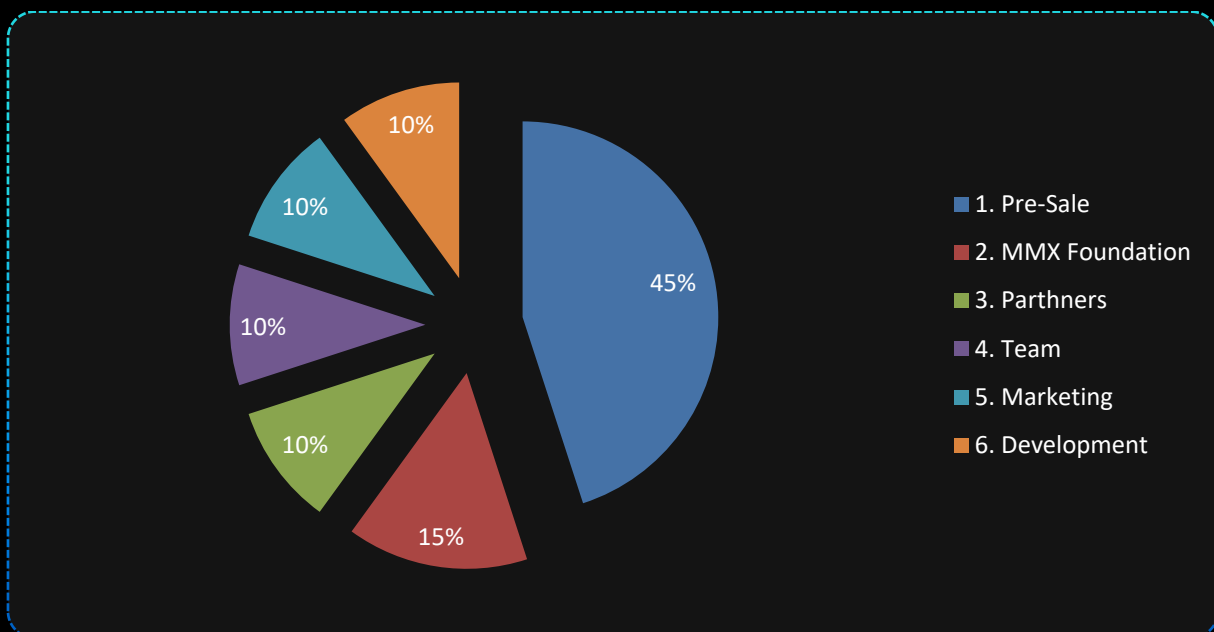

Partners Wallet Address: 0xbDc7bb732110E829962ffb4A378FD17c8A9C543e

Team Wallet Address:0x281869465B56695b709D37dcAF3c592DC1d0f3F8

Marketing Wallet Address:0x89d3B8015F78426A0910cC2f653879787Cd26d92

Development Wallet Address:0x4fffF6B886a94179bFc04bb8F6cC00cE548C00E0
